

Transplant 365 Option

Solid organ and bone marrow transplants are a leading driver of catastrophic costs for health plans, including self-funded groups. Expanding transplant waiting lists, technological advancements and changes in contracting methodologies all add to the growing expense.

PartnerRe takes a client-centered approach to organ transplant management; customizing transplant networks, care management and claim management to fit our client's risk appetite and unique coverage needs. We offer proven risk management solutions dedicated to optimizing both clinical and financial outcomes. To assist in managing transplant healthcare costs, PartnerRe offers our Transplant 365 option. All directly related transplant costs incurred and paid up to 365 days post-transplant, will attach to the benefit period in which the transplant was incurred. In most cases, this will eliminate the need to fulfill two specific deductibles, resulting in substantial savings to the plan sponsor.

PROGRAM FEATURES
