

Transplant 365 Option

Organ and bone marrow transplants are a leading driver of catastrophic costs for health plans, including self-funded groups. Expanding transplant waiting lists, technological advancements and changes in contracting methodologies all add to the growing expense.

This option provides enhanced transplant risk management and potential cost reduction. It is designed to achieve savings by eliminating the need for multiple annual plan deductible payments per transplant.

Transplant 365 Option allows us to deliver customized transplant networks and optimized cost management, aligned to your risk appetite and coverage needs.

Program Features

Transplants are coordinated through **PULSE + Plus™** using a transplant center of excellence. Covered transplants include:

heart
heart-lung
lung
double lung
liver
pancreas
kidney-pancreas
kidney
small bowel
hematopoietic stem cells

- For transplants incurred during the coverage period, all costs incurred and paid up to 365 days after the transplant may be subject to only one (not two as is often the case) plan deductible, for the period in which the transplant occurred
- Access to the top national transplant networks
- Access to all **PULSE + Plus™** program cost management services
