

New range of health services to manage escalating costs

In response to our U.S. Health clients' concerns about mounting medical claims costs, we increased the risk mitigation services of *PULSE + Plus™* with additional experienced clinical staff and consulting and cost-saving services. The result, a strong partnership solution for our clients' medical and catastrophic claims management needs.

Understand

Our clients were concerned about anticipated higher medical costs as a result of the Affordable Care Act (ACA) and needed a better solution for the wide variety of risk-taking roles under their management. Their view was that our risk solution, *PULSE + Plus™*, was better aligned to their business than typical reinsurance medical management program models, but that it could be enhanced. However, our surveys and discussions with clients showed that a "one-size-fits-all" approach would not work – any expansion of services would need to be flexible, including options for client-specific challenges and needs.

Partner

Adapting ideas and applying our experience of the most successful strategies, we expanded our solution to include an even wider range of services for risk assessment, medical and catastrophic claim management and cost containment. In some cases, this included developing new relationships with experts to partner with *PULSE + Plus™* and our clients.

Act

PULSE + Plus™ represents a resource for our clients for all their medical management needs and a partnership for managing catastrophic claims. *PULSE + Plus™* provides clients with a full range of clinical risk management programs and resources, as well as ongoing knowledge sharing on issues that impact costs. We also continue to produce webinars, publish articles and guidelines to assist clients in mitigating risk.
